Although the Perlin arin on freight traffic, project was a possibility serlin from GDR railroad eptember, the number of mankment through Lake mund was increased from the piecework wages of the piecework wages of the piecework.	
	the spring of 1957. At the conference it was also Firkenwerder - Vusterrark sections of this rail ci and that construction work on the last remaining g Saar and had just been started.  It was learned that the SED Central Committee stroreported completion date of the Berlin rail circuit possibly required for the clarification of the Berlin Foreign Ministers' Conference in October. It appea Committee still believes in a neutralization of Berail circuit will considerably ease the present st the basic concept underlying the designs of this pof completely eliminating the western sectors of Etraffic.  It was pointed out in this commection that on 1 Seworkers employed on the erection of a railroad embedding of the proposed on the railroad line between Golm and Saar 3,000 to 5,000. Another remarkable fact was that the construction workers employed there had been increwages of construction workers in other nationalization be cut.	made known that the rewit had been completed ap between Golm and ongly objected to the it in view of the measures thin situation after the was that the SED Central writin. Although the Perlin wain on freight traffic, project was a possibility Serlin from CDR railroad eptember, the number of mankment through Lake mund was increased from the piecework wages of the mased, while the piecework and enterprises are scheduled attruction of a railroad aded in preliminary construction the completed by 1 October 1956. The progress of construction	n
3.	the spring of 1957. At the conference it was also Firkenwerder - Vusterrark sections of this rail ci and that construction work on the last remaining g Saarrand had just been started.  It was learned that the SED Central Committee structure reported completion date of the Berlin rail circuit possibly required for the clarification of the Per Foreign Ministers' Conference in October. It appears committee still believes in a neutralization of Berail circuit will considerably ease the present state the basic concept underlying the designs of this post completely eliminating the western sectors of Example 1975.  It was pointed out in this connection that on 1 Seworkers employed on the erection of a railroad embedding of the railroad line between Golm and Saar 3,000 to 5,000. Another remarkable fact was that the construction workers employed there had been increased as the construction workers in other nationalization be cut.  The GDR press has been directed not to report on twork. The GDR Ministry of Traffic has reserved for	made known that the rewit had been completed ap between Golm and ongly objected to the it in view of the measures thin situation after the resthat the SED Central order. Although the Ferlin train on freight traffic, project was a possibility corlin from GDR railroad extends through Lake round was increased from the piecework wages of the based, while the piecework and enterprises are scheduled trustion of a railroad anded in preliminary construction learned that the last remaining completed by 1 October 1956.
